AMOS™ 8.1 (Mar. 2009) Update DVD Now Available *Includes AM-8000™, Eagle 800™, and AMPC™ 7.1 Software Releases*

Dear Alpha Micro Dealer:

The latest AMOS 8.1 Update DVD has just been released and is now available to all dealers. This Update DVD includes the following major software:

- Very latest AMOS 8.1 software release for AM-8000 and Eagle 800 systems
- AMPC 7.1, the new software release for SuperFalcon™, Cardinal™, and Eagle 750™ users.
- AlphaODBC™ 1.4B software release, an updated version of AlphaODBC

AMOS 8.1 Software Release (March '09)

The latest AMOS 8.1 software release contains the following updates to the January '06 release:

- Updated OSINST AMOS PIC code program.
- DVD and Blu-ray DBD format backup and restore software
- Updated AlphaTCP™ version 1.5C software
- Updated AlphaODBC version 1.4B software
- Updated Xadmin files for AM-8000 and AMPC software versions.
- Updates to MULTI™, AlphaWRITE™, and AlphaFAX™ software
- Accumulated patches and bug fixes to many other software components
- UltraVNC™ optional update
- Registry cleaner optional installation
- Updated documentation
- Updated AMOS emulator 1.1(939C7) with many important fixes and enhancements

Details of the changes and additions to the AMOS 8.1 software can be found in the Release Notes, DSS-10618-85, rev A02, contained on the Update DVD. This document can also be found at www.alphamicro.com in the documentation area.

AMPC 7.1 Software Release

The new AMPC 7.1 software for Series II and II Eagle 750 systems and Windows Vista[®], XP Professional[®] or Home[®] based PCs containing a SuperFalcon board or Cardinal USB dongle is now available and contained on the Update DVD. This release incorporates the applicable fixes and improvements contained in the latest AMOS 8.1 software release.

Complete installation instructions and software information are contained on the documentation included with the AMPC 7.1 software.

AlphaODBC 1.4B Software Release

The new AlphaODBC 1.4B software release contains a number of enhancements designed to improve speed and WHERE clause functionality in ISAM and ISAM Plus environments. See the separate AlphaODBC 1.4B Marketing Bulletin for more details.

Keep Up With The Latest Improvements

Software development at Alpha Micro proceeds at a good pace. Every month, many of our products are being enhanced. It behooves all of our dealers to have the latest versions of our new, rapidly evolving products, to ensure that your end-users have access to all of the fixes and enhancements being done.

Dealers with annual Technical Support contracts will be sent one copy of this DVD at no charge. For those dealers wishing to purchase a copy of the DVD, see the reseller supplement attached to this Marketing Bulletin. To order one or more copies, contact Alpha Micro Order Administration at (800) 289-2574.
