AMOS for the SuperFalcon — See Section 1, *Hardware*, for AMPC software.

**Part
Number**

Description

AMOS 8.X Update CD & AlphaCD Software

For AMOS 8.0 and later software, update CDs are created periodically and one copy is sent to all VARs with Technical Support contracts. Additional copies may be ordered per the part number listed below. Each new system ordered (AM-8000 or Eagle 800) also contains a bootable CD containing AMOS 8.X and the latest released software at time of system shipment.

For AMOS 2.3 and AMOS 1.4E version software, the latest AlphaCD (March 2002) contains virtually all AMOS software, plus third-party software from AMOS developers who have chosen to participate. There is on-line documentation included on the AlphaCD as well.

Dealers who sign up for either the Platinum, Gold or Silver Technical Support options that are available include CD updates when they become available.

The CDs described above are also available separately by ordering the following part numbers:

PSC-00017-50 AlphaCD Updates for AMOS 2.3 and AMOS 1.4E software, each
SCD-00028-50 AMOS 8.1 Update CD, May 2005, each
VARs with Technical Support Contracts get one free copy and can purchase additional copies.

Operating System Software

Pre-AMOS 8.x Release PIC Code Update Fee

A fee will be charged to update pre-AMOS 8.x releases, aside from possible additional charges to increase the number of users. Examples of situations where this fee will apply are:

- AMOS/L to AMOS/32 same major version (e.g.: 1.x to 1.x, 2.x to 2.x)
- AMOS 1.x to AMOS 2.x

Previously Issued PIC Code Administrative Fee

A fee per SSD will apply for a request to lookup previously issued PIC Codes for all Alpha Micro software products. This fee will also apply if you ask Alpha Micro to look up whether a certain SSD has a certain software product encoded to it.

AMOS 8.1 Operating System

AlphaNET, AlphaTCP, and AlphaDDE are standard with AMOS 8.X. There's no need to order them or to enter separate PIC codes. You must, however, make sure that the AMOS license is large enough to cover *all* users, including network-attached workstations.

LightningBASIC is included with AMOS 8.1 and later Operating System Software, but does require a separate PIC code. See details in Marketing Bulletin AMB2005-09.

AM-8000 Systems

PIC-08008-00 AMOS 8.0 E/U License PIC for AM-8000 Systems. - Order as many ports as you require.

Eagle 800 Systems

**Part
Number**

Description

PIC-08018-01 AMOS 8.0 E/U License PIC for Eagle 800 Systems

Eagle 800LC Systems

An AMOS 8.0 4 port E/U License PIC is supplied with the basic system.

PIC-08028-01 AMOS 8.0 E/U License PIC for Eagle 800LC Systems, additional ports

The Eagle 800LC is limited to a maximum of 16 ports.

AMOS 1.4E Operating System

AMOS 1.4E is available in two versions: as a full operating system and as an overlay download (ODL). Both versions are distributed on the AlphaCD. You can load the ODL version on-site or transmit it from a remote location via modem. For details see Marketing Bulletin AMB98-31, *Progress Report #5 on Year 2000 Compliance*, Oct. 1, 1998.

ELP-04717-00 AMOS 1.4E ELP. Includes End User License.

PIC-U4717-01 AMOS 1.4E Update for AMOS 1.X license purchased **prior to January 1, 1997.**

PIC-04717-00 AMOS 1.4E Initial End User License PIC — This is the full operating system, for installation on a system not previously covered by an AMOS license. Also applies to **any AMOS 1.4E license purchased after June 30, 1999.**

AMOS 1.4E Field Port Count Upgrades (port expansion)

PIC-U4717-UP AMOS 1.4E Field Level Port Upgrade.

AMOS 2.3A Operating System

AlphaNET, AlphaTCP, and AlphaDDE are standard with AMOS 2.3A. There's no need to order them or to enter separate PIC codes. You must, however, make sure that the AMOS license is large enough to cover *all* users, including network-attached workstations.

ELP-04417-00 AMOS 2.3A ELP Includes End User License.

PIC-04417-XX AMOS 2.3A Initial E/U License PIC - Order as many ports as you require at initial order time.

AMOS 2.3A Field Port Count Upgrades

PIC-U4417-XX AMOS 2.3A Field Level Port Upgrade.

Language Software

ASSEMBLER Included with AMOS

BASIC

AlphaBASIC Included with AMOS

<u>Part Number</u>	<u>Description</u>
AlphaBASIC+	Included with AMOS 2.3A and AMOS 8.0
PIC-04987-03	LightningBASIC 1.0 for Eagle 800 and Eagle 800LC systems sold prior to May 9, 2005. Included with all AM-8000 systems and Eagle 800 and 800LC systems purchased after May 9, 2005.

FORTRAN 77 (Version 2.3)

B0M-FOR23-00	AlphaFORTRAN 77 MLP version 2.3. Includes keyed software. Software is furnished on a CD-ROM.
B0E-FOR23-00	AlphaFORTRAN 2.3 development ELP. Includes keyed software. Software is furnished on a CD-ROM.
B0E-FOR23-01	AlphaFORTRAN 2.3 run-time ELP. Includes keyed software. Software is furnished on a CD-ROM.
PSK-01437-40	AlphaFORTRAN development update to version 2.3. Includes software. Software is furnished on a CD-ROM.
PSB-01447-40	AlphaFORTRAN run-time update to version 2.3. Includes software. Software is furnished on a CD-ROM.

Communications & Networking Support Software

All software products listed in this section are included with both AMOS 2.3A and AMOS 8.0. There is no need to order them separately unless you are upgrading a system with an older operating system.

AlphaNET 2.4

AlphaNET Product Highlights

Brief description—AlphaNET is a simple and relatively inexpensive networking protocol, native to AMOS, for use on small local area networks. AlphaNET lets AMOS systems talk to each other over Ethernet or RS-232 serial connections. AlphaNET 2.4 includes AlphaNET/PC 3.2, a vehicle for connecting PCs to an AlphaNET network.

AlphaNET is not routable, so it can't be used outside its own local area network. AlphaNET should not be used on very busy networks or on error-prone networks. Where any of these conditions exist, use AlphaTCP instead.

AMOS compatibility—AlphaNET 2.4 is compatible with AMOS 1.X, AMOS 2.X, and AMOS 8.X. Operation with AMOS 1.X is restricted to Type 1 connections (significant performance limitation).

Licensing—It is not necessary to order AlphaNET if system has AlphaTCP or AMOS 2.3 and AMOS 8.X—Under AMOS 2.3 and later versions of AMOS, AlphaNET is standard and has no PIC. You must still install AlphaNET software if you wish to use AlphaNET.

Falcon compatibility—AlphaNET 2.4 is supported on a SuperFalcon or Falcon running AMPC 4.1 or later.

Software distribution—AlphaNET 2.4 software is available on the AlphaCD.

Updates—You can order an update to AlphaNET 2.4 for any system that has a prior version of AlphaNET installed. Call Order Administration and give us the SSD number. We will then issue a no-charge PIC for as many Type 2 Connection Authorizations (TCAs) as the system has currently-licensed AMOS ports.

AlphaNET 2.4 Price List

**Part
Number**

Description

AlphaNET comes bundled with all currently manufactured systems.

- PIC-03927-00 AlphaNET 2.4 Type 2 Connection Authorization (TCA) for one AMOS host system.
- For AMOS 2.X systems:** Order enough TCAs to enable as many Type 2 connections as this host will require at any one time. Number of TCAs cannot exceed the number of AMOS 2.X ports currently licensed.
- For AMOS 1.X systems:** Order one TCA to enable AlphaNET operation. All connections will be Type 1 only.

AlphaTCP 1.5A

AlphaTCP Product Highlights

Brief description—AlphaTCP is Alpha Micro's implementation of TCP/IP, an industry standard network protocol. TCP/IP is an open, non-proprietary standard. It is available on virtually all computers and PCs, sometimes as a standard feature and sometimes as an option. Different computers using different operating systems can use TCP/IP to communicate with each other over local area networks, wide area networks, and the Internet.

AlphaTCP, like other TCP/IP implementations, provides many specific features and functions. These include remote login (also called a virtual terminal connection), which lets you log on to another host; file transfer connections, such as FTP; electronic mail; Web server support; and network printer access. See Marketing Bulletins for key new features of AlphaTCP releases.

AMOS compatibility—AlphaTCP requires AMOS 2.2C, AMOS 8.0 or later. Operation with AMOS 1.X is not supported.

Metropolis™ and FLiP™ compatibility—AlphaTCP operation with Metropolis 7.4 is supported under AMOS 2.2C, AMOS 8.0, and later releases.

SuperFalcon compatibility—Under AMPC 4.1 and later, the AMOS side of a Falcon system can use AlphaTCP to communicate with other computers.

Other prerequisites—Following prerequisites for AlphaTCP 1.5A are the same as for prior versions:

- The serial ports used by SLIP cannot be on an AM-350 board. SLIP will not work on an AM-1000, AM-1200, or AM-1400, or with I/O controllers that do not support flow control (e.g., AM-318 and AM-358).

It is not necessary to order AlphaTCP if system has AMOS 2.3 or later—Under AMOS 2.3 and later versions of AMOS, AlphaTCP is standard and has no PIC. However, you must still install AlphaTCP software if you wish to use AlphaTCP.

Software distribution—AlphaTCP 1.5A is available on the AlphaCD of June 2000 or later.

Updates—No change in PIC code required when updating to AlphaTCP 1.5A from prior releases AlphaTCP 1.3 or later. By downloading the software from the AlphaCD, you can perform the update at no charge. [For updates from releases prior to AlphaTCP 1.3, see Marketing Bulletin AMB95-49, *AlphaTCP 1.3 Now Available*; Aug. 11, 1995.]

AlphaTCP 1.5A Price List

AlphaTCP comes bundled with all currently manufactured systems.

<u>Part Number</u>	<u>Description</u>
ELP-03537-00	AlphaTCP End User License Package.
B0E-P3537-02	AlphaTCP 1.5A PIC. Includes 17+ user AlphaTCP PIC plus one AlphaNET 2.4 Type 2 Connection Authorization (TCA). This PIC works with any size AMOS license, irrespective of the number of users.

AlphaDDE 1.2

AlphaDDE Product Highlights

Brief description—AlphaDDE is client/server software for sharing data between AMOS and Windows. It allows a client program (running in a Windows PC) to obtain data from a server (an application running in an AMOS host). Implementing a new AlphaDDE application usually requires software development.

AMOS compatibility—AlphaDDE 1.2 requires AMOS 2.2C or later.

Other software prerequisites—AlphaDDE 1.2 also requires the following:

- AlphaTCP 1.1 or later
- AlphaNET 2.3 or later (needed only if Ethernet driver .LDV is *not* used)
- A Winsock-compliant TCP/IP protocol stack on the PC (protocol stack not provided by Alpha Micro)
- Windows 3.1, Windows for Workgroups 3.11, Windows 95, Windows 98, or later versions

Development tools supported—The AMOS side of an AlphaDDE application can be developed using Assembler or AlphaBASIC. The PC side can be a standard Windows application, such as Microsoft Excel or Word; or a customized application developed with tools such as Microsoft Visual Basic or C.

Falcon compatibility—AlphaDDE does **not** run in Falcon systems.

Software distribution—AlphaDDE 1.2 is available on the AlphaCD.

Updates—No change in PIC code is required when updating to AlphaDDE 1.2 from AlphaDDE 1.1. By downloading the software from the AlphaCD, you can perform the update at no charge.

AlphaDDE 1.2 Price List

AlphaDDE comes bundled with all currently manufactured systems.
--

ELP-04187-00	AlphaDDE 1.2 End User License Package.
PIC-04187-01	AlphaDDE 1-user PIC
PIC-04187-02	AlphaDDE 2-user PIC
PIC-04187-04	AlphaDDE 4-user PIC
PIC-04187-06	AlphaDDE 6-user PIC
PIC-04187-12	AlphaDDE 12-user PIC
PIC-04187-24	AlphaDDE 24-user PIC
PIC-04187-64	AlphaDDE 64-user PIC
PIC-04187-C8	AlphaDDE 128-user PIC

Office Automation and Utility Software

Re-Licensing Year 2000 Compliant Applications at Existing Installations

**Part
Number**

Description

The following office automation and utility software products were updated, as of the 10/98 AlphaCD, to achieve Year 2000 compliance:

AlphaCALC 2.0 AlphaWRITE 1.2A AlphaWRITE 2.2 AlphaMAIL 1.2B MULTI 2.1

PIC codes of the updated versions are unchanged. There is a re-licensing fee to update an application that was purchased prior to January 1, 1997. Applications purchased after that date can be updated at no charge.. A detailed explanation of re-licensing appears in Marketing Bulletin AMB98-31, *Progress Report #5 on Year 2000 Compliance*, Oct. 1, 1998.

AlphaWRITE Word Processing (Version 2.2)

- B0U-WRT20-00 AlphaWRITE 1.X to AlphaWRITE 2.2 Master License update kit.
Includes 16-user PIC.
- PSB-01907-40 AlphaWRITE 2.x to AlphaWRITE 2.2 update package.
- ELP-01907-00 AlphaWRITE 2.2 End User License Package
- PIC-01907-99 Demonstration PIC
- PIC-01907-00 4 User PIC
- PIC-01907-01 8 User PIC
- PIC-01907-02 16 User PIC
- PIC-01907-03 32 User PIC
- PIC-01907-04 64 User PIC
- PIC-01907-05 128 User PIC
- PIC-01907-06 Unlimited User PIC

Update to an existing installation of AlphaWRITE 2.2

- PIC-01907-20 AlphaWRITE 2.2 (purchased **prior to January 1, 1997**)
- PIC-01907-21 AlphaWRITE 2.2 (purchased **after January 1, 1997**)

INSTALLED BASE UPDATES

Current AlphaWRITE 1.2 or 1.2A users who have existing PICs on file may update to a 32-user version of AlphaWRITE 2.2.

- PIC-01907-U2 5 to 32 user update

AlphaWRITE Word Processing (Version 1.2A)

Update to an existing installation of AlphaWRITE 1.2A

- PIC-00541-20 AlphaWRITE 1.2A (purchased **prior to January 1, 1997**)
- PIC-00541-21 AlphaWRITE 1.2A (purchased **after January 1, 1997**)

AlphaCALC Spreadsheet (Version 2.0)

- ELP-03097-00 AlphaCALC 2.0 End User License Package
- PIC-03097-00 4 User PIC
- PIC-03097-01 8 User PIC
- PIC-03097-02 16 User PIC
- PIC-03097-03 32 User PIC
- PIC-03097-04 64 User PIC
- PIC-03097-05 128 User PIC
- PIC-03097-06 Unlimited User PIC

**Part
Number**

Description

AlphaCALC 2.0 Upgrade Pricing

PIC-03097-U2 AlphaCALC 2.0 Field Update PIC - 32 users.

Update to an *existing installation* of AlphaCALC 2.0

PIC-03097-20 AlphaCALC 2.0 (purchased **prior to January 1, 1997**)

PIC-03097-21 AlphaCALC 2.0 (purchased **after January 1, 1997**)

MULTI Window-based Environment Manager (Version 2.1)

PIC-01637-99 MULTI 2.1 - Demonstration PIC

PIC-01637-00 MULTI 2.1 - 4-User PIC

PIC-01637-01 MULTI 2.1 - 8-User PIC

PIC-01637-02 MULTI 2.1 - 16-User PIC

PIC-01637-03 MULTI 2.1 - 32-User PIC

PIC-01637-04 MULTI 2.1 - 64-User PIC

PIC-01637-05 MULTI 2.1 - 128-User PIC

PIC-01637-06 MULTI 2.1 - Unlimited User PIC

PIC-01637-UP MULTI 2.1 - Upgrade PIC (32-User)

Update to an *existing installation* of MULTI 2.1

PIC-01637-20 MULTI 2.1 (purchased **prior to January 1, 1997**)

PIC-01637-21 MULTI 2.1 (purchased **after January 1, 1997**)

AlphaMAIL Electronic Mail (Version 1.2)

PIC-04787-99 AlphaMAIL 1.2B Demonstration PIC

PIC-04787-00 AlphaMAIL 1.2B 4-user PIC

PIC-04787-01 AlphaMAIL 1.2B 8-user PIC

PIC-04787-02 AlphaMAIL 1.2B 16-user PIC

PIC-04787-03 AlphaMAIL 1.2B 32-user PIC

PIC-04787-04 AlphaMAIL 1.2B 64-user PIC

PIC-04787-05 AlphaMAIL 1.2B 128-user PIC

PIC-04787-06 AlphaMAIL 1.2B unlimited-user PIC

AlphaMAIL End User Updates

For current AlphaMAIL installations with existing PICs on file, you can update to a 32-user version of AlphaMAIL 1.2

AlphaFAX Facsimile Management (Version 2.1)

AlphaFAX 2.1 is available from <http://ampm.alphamicro.com> for our Technical Support subscribers.

PIC-04807-00 AlphaFAX 2.1 End User License Package. Includes one PIC

PIC-04807-10 AlphaFAX 2.1 Plus End User License Package. Includes one PIC

PIC-U4807-10 AlphaFAX 2.1 Plus Update Package: from AlphaFAX 1.X or
AlphaFAX 2.1. Includes one PIC

NOTE: Existing users can load AlphaFAX 2.1 over AlphaFAX 2.0, at no charge, using the existing PIC encodement. The update is chargeable only when moving to AlphaFAX 2.1 *Plus*.

**Part
Number**

Description

AlphaODBC Database Access Software

- B0M-ODBC1-00 AlphaODBC Master License Package. Includes one PIC.
For dealer / developer use only, not for resale by dealer or
developer.
- B0E-ODBC1-00 AlphaODBC End User License Package. Includes one PIC

NOTE: AlphaODBC software and documentation (in HTML format) are available at <http://www.alphamicro.com/ODBC>. Contact our Technical Support department at (800) 487-7877 for other requirements.

Miscellaneous Software

TrueGUI

- PIC-05007-00 *TrueGUI* Software End User License Package
1st - 3rd Concurrent User on one LAN
4th - 9th Concurrent User on one LAN
10th + Concurrent User on one LAN
- TAC-TGUI0 05 One year *TrueGUI* Update Subscription Renewal, per Standalone
License or per License Server

AlphaCD-WRITER

- PIC-04937-00 AlphaCD-WRITER 1.0 End User License Package
Includes one PIC

AM-403 DVD-RAM Software

- PIC-04967-00 AM-403 DVD-RAM Software, including MAKDVD and
DVD.DVR PIC. Only required if a DVD-RAM drive was
purchased elsewhere.

AlphaLAN⁺⁺

- NOTE 1. Per-Node Licensing — AlphaLAN⁺⁺ is licensed on a per-node basis. A node is defined as any PC that has a copy of AlphaLAN's PC-side software. Exception: if the PCs are on a TCP/IP network, it is only necessary to license as many AlphaLAN nodes as will simultaneously connect, via TELNET or FTP, to the server. You can therefore have more PCs than nodes. This feature is a major advantage of AlphaLAN⁺⁺ over AlphaLAN 6.X and prior versions, and over competitive products.**
- NOTE 2. New Activation keys — Upgrading to AlphaLAN⁺⁺ 9.0 from 8.0/7.1 requires a new activation key for the PC side software. For details see "AlphaLAN Upgrades" below.**
- NOTE 3. WinLPD Option — Must be ordered for each PC that will run LPD or LPR client services.**
- NOTE 4. Software — Both AMOS side software and PC side software for AlphaLAN⁺⁺ is now available on www.uasys.com. PC-side software can also be ordered on CD-ROM or diskettes; see the price list below.**

<u>Part Number</u>	<u>Description</u>
PSV-04817-50	AlphaLAN ⁺⁺ PC software on CD-ROM.
PSV-04817-40	AlphaLAN ⁺⁺ PC software
ELV-04817-01	Printed documentation for complete AlphaLAN ⁺⁺ (AMOS side and PC side)

Node Licenses for AlphaLAN⁺⁺

PIC-04817-00	AlphaLAN ⁺⁺ , First Node
PIC-04817-01	AlphaLAN ⁺⁺ , each Subsequent Node 2 through 12
PIC-04817-13	AlphaLAN ⁺⁺ , each Subsequent Node 13 through 47
PIC-04817-48	AlphaLAN ⁺⁺ , each Subsequent Node 48 and up

WinLPD License

NOTE 5. The following license is required for each PC that will run LPD or LPR client services.

PIC-04817-02	WinLPD Option for one PC.
--------------	---------------------------

AlphaLAN⁺⁺ Upgrades

PIC-U4817-00	AlphaLAN ⁺⁺ Upgrade, First Node
PIC-U4817-01	AlphaLAN ⁺⁺ Upgrade, each Subsequent Node 2 through 12
PIC-U4817-13	AlphaLAN ⁺⁺ Upgrade, each Subsequent Node 13 through 47
PIC-U4817-48	AlphaLAN ⁺⁺ Upgrade, each Subsequent Node 48 and up

STEP⁺⁺

STEP⁺⁺ Multi-Packs

STEP⁺⁺ software licenses are available in packs of 5, 10, 25, 50, and 100. A STEP⁺⁺ MULTI-PACK is a license to copy and use STEP⁺⁺ software up to the designated number of users. A multi-pack license uses a Product Serial Number (PSN) and an Activation Key and is valid for the designated number of users. These PSNs and Activation Keys are available to you from U.A. Systems when you order the STEP⁺⁺ License Pack. Please also note that the technical support for MULTI-PACKs will be limited to 30 days from the date of purchase. Please refer to the STEP⁺⁺ Software License Agreement for details.

Documentation and Software Media

ELV-04927-00	STEP ⁺⁺ Documentation and Media Kit. Contains a manual, Release notes, and PC side software on CD-ROM.
--------------	---

STEP⁺⁺ Software Licenses - New Purchases

PIC-04927-01	STEP ⁺⁺ , Software License, Single Copy
BOE-04927-05	STEP ⁺⁺ , Software License, 5-Pack
BOE-04927-10	STEP ⁺⁺ , Software License, 10-Pack
BOE-04927-25	STEP ⁺⁺ , Software License, 25-Pack
BOE-04927-50	STEP ⁺⁺ , Software License, 50-Pack
BOE-04927-C0	STEP ⁺⁺ , Software License, 100-Pack

**Part
Number**

Description

WinLPD License

NOTE. The following license is required for each PC that will run LPD or LPR client services.

PIC-04817-02 WinLPD Option for one PC.

STEP⁺⁺ Upgrades

If you have a prior version of STEP installed, you can upgrade to STEP⁺⁺ at the reduced prices shown below. Upgrades are like for like. You can upgrade a single-copy license to a single-copy license, 5-pack license to a 5-pack license and so on for other licenses.

PIC-U4927-01	STEP ⁺⁺ , Software Upgrade, Single Copy
BOE-U4927-05	STEP ⁺⁺ , Software Upgrade, 5-Pack
BOE-U4927-10	STEP ⁺⁺ , Software Upgrade, 10-Pack
BOE-U4927-25	STEP ⁺⁺ , Software Upgrade, 25-Pack
BOE-U4927-50	STEP ⁺⁺ , Software Upgrade, 50-Pack
BOE-U4927-C0	STEP ⁺⁺ , Software Upgrade, 100-Pack

Accessories

Keyboard Overlays

DWF-20508-01	AlphaWRITE 2.X Function Key Overlay for 12-key PC-style keyboard
DWF-20512-01	AlphaWRITE 2.X Function Key Overlay for AM-65/75 terminals
DWF-20508-04	AlphaCALC 2.0 Function Key Overlay for 12-key PC-style keyboard
DWF-20512-04	AlphaCALC 2.0 Function Key Overlay for AM-65/75 terminals
